Championship Yachting CHRONOGRAPH

This slim, elegant watch has been designed by experts exclusively for the discriminating sailor who requires the best, regardless of price.

The top quality Swiss movement employs a jewelled lever escapement, ensuring the highest standard of accuracy, and is shock protected by "Incabloc". The clear, black, non-reflective dial has tritium illuminated batons and matching inlaid nickel time of day hands.

The fully independent stop-watch operates an exceptionally clear fluorescent red centre sweep, calibrated to 1/5 second, synchronised to a matching elapsed minute hand, traversing a unique dual dial, for positive read out under all conditions. Able to record a wide range of elapsed time for navigational purposes, it is particularly designed to time racing starts at the press of a button. The light but strong diving case is tested to 3 atmospheres, approximately 100 feet depth, and has a stainless steel screw back.

£19.75

Boxed—complete with water-proof strap and written 12 month guarantee
